## BULLET RB26 BILLET BLOCK

*The Bullet RB26 to suit Nissan RB26 applications has been proven in World Time Attack competition.*

*This product has vastly improved block rigidity and improved deck thickness over the stock unit. Combined with increased head stud diameter this product delivers exceptional head sealing qualities.*

*Distortion of cylinder bores and crank tunnel is dramatically reduced through design improvements and a Bullet 4 bolt main cap system.*

*This product offers significant weight savings and has minimal modifications to directly replace the standard block.*

### Specifications

Name of product:	RB26 (Nissan RB26)
Actual weight:	40kg
Stock block weight in comparison:	70kg (N1)
Block material:	6061 aircraft grade billet aluminium.
Design improvements:	4 bolt mains, increased block deck and cylinder wall thickness. Performance sleeves fitted
Studs included:	1/2" Head and 7/16" Main
Modifications required to fit:	Remote Oil Filter Kit
Modifications to head required:	Drill out head stud holes to 14mm.
HP rating:	1800*
Significant benefits:	Weight saving, significantly increased rigidity and durability. May be bored to 89mm
Finish:	Raw machined
Options Available:	Bullet Fire Ring Head Sealing System Wet or Dry Deck available

\*dependent on application, internals and tune
