“CHOICE OF CHAMPIONS”

BULLET HONDA B SERIES BILLET BLOCK

The Bullet B series to suit all Honda B Series applications has been engineered to deliver reliability in 1700hp environments. .

This product has vastly improved block rigidity and improved deck thickness over the stock unit. Distortion of cylinder bores and crank tunnel is dramatically reduced through increased material thickness and a Bullet 4 bolt main cap system.

This product requires minimal modifications to directly replace the standard block.

Specifications

Name of product:	Honda B Series (suits all B series applications)
Actual weight:	36kg
Block material:	6061 aircraft grade billet aluminium.
Design improvements:	4 bolt mains, increased block deck and cylinder wall thickness. Ductile Iron performance sleeves fitted
Studs included:	1/2" Head and 7/16" Main
Modifications required to fit:	Remote Oil Filter required. Water inlet pipe modification
Modifications to head required:	Drill out head stud holes to 14mm.
HP rating:	1700*
Significant benefits:	Weight saving, significantly increased rigidity and durability. May be bored to 85mm
Finish:	Raw machined
Options Available:	Bullet Fire Ring Head Sealing System Wet deck, Dry deck and Solid Block options

*dependent on application, internals and tune
